

TestObjectApplication.java

```
1  class TestObjectApplication{
2      public static void main(String[] args){
3          B_Point p1 = new B_Point(10, 10);
4          B_Point p2 = new B_Point(10, 20);
5          B_MovingPoint m1 = new B_MovingPoint(0, 0);
6          B_MovingPoint m2 = new B_MovingPoint(0, 0);
7          m1.setVelocity(2, 3);
8          m2.setVelocity(-4, 2);
9          for ( int i = 0; i < 10; i++ ) {
10             m1.move();
11             m2.move();
12         }
13         p1.print();
14         p2.print();
15         m1.print();
16         m2.print();
17         System.out.println(p1.getDistance(p2));
18         System.out.println(m1.getDistance(m2));
19     }
20 }
```
